ABOUT ME

Results-driven Senior Full Stack Developer with 9+ years of experience building scalable web applications, enterprise systems, and digital solutions that drive business growth. Expertise in Laravel, React, Node.js, Vue.js, Angular, Nuxt.js, PHP, JavaScript/TypeScript, and Python automation. Strong experience in **fintech and accounting applications** including double-entry accounting, project budgeting, payment orders and purchase order workflows. Proven track record in delivering ERP/CRM systems, document management solutions, property/fleet/budget management platforms, **e-commerce solutions** (WordPress, Laravel, React), **Learning Management Systems** (LMS), and secure business applications.

Skilled in SEO and ranking web pages on Google Search, creating high-converting websites, and managing digital marketing campaigns including Facebook Ads and Google Ads. Passionate about clean code, performance, scalability, and using technology to solve real-world business challenges.
