

NABEEL JAVED

**Software Developer | Applied AI/ML Engineer
Education Trainer**

Remote | Hybrid | Full Time

Visa Status: Employment Visa

Marital Status: Married

Email: nabeeljaved2029@gmail.com

Contact: +971 52 107 7862

Nationality: Pakistan | Current Location: UAE

Professional Summary

Results-driven Full stack Developer, and Course Instructor / Trainer with 9+ years of experience designing and delivering scalable web applications, ERP systems, CRM platforms, fintech solutions, property management systems, POS platforms, and enterprise software. Strong expertise in Laravel, PHP, Node.js, React, JavaScript, .NET, REST APIs, SQL/NoSQL databases, and system design, with end-to-end SDLC experience using Agile/Scrum methodologies.

Hands-on with Python, Flask, FastAPI, scikit-learn, pandas, NumPy, supervised learning, classification, regression, unsupervised learning, clustering, and AI-assisted development tools for practical AI/ML integration. Familiar with data preprocessing, model training, evaluation, prediction APIs, Data Science fundamentals, Deep Learning, NLP, Computer Vision, Generative AI, and LLM concepts, with the ability to build and integrate AI-powered features into existing Laravel and Node.js applications.

Skilled in backend architecture, MVC and service-layer design, queues, jobs, events, event-driven systems, RabbitMQ, Worker Threads, automated testing, CI/CD, performance optimization, debugging, and scalable API development. Experienced in delivering technical training and translating complex programming, software engineering, and AI/ML concepts into practical, project-based learning.

Professional Experience

Software Developer – Restech Solutions - <https://restech.digital>

July 2024 – Present | UAE

- Developed Property Management Software using Laravel with MVC architecture, service-layer design, REST APIs, Jobs, Queues and Events for maintainable and scalable business workflows.
- Built and maintained property workflows, reusable backend services and asynchronous processing for core property and tenant operations.
- Developed a Point of Sale (POS) platform using the MERN stack: MongoDB, Express.js, React.js and Node.js with modular MVC-style backend organization.
- Applied Node.js Event Loop concepts and Worker Threads for asynchronous and CPU-intensive workloads.
- Implemented RabbitMQ messaging and Event-Driven Architecture for background processing and communication between application components.
- Focused on scalable API design, debugging, performance optimization and production-ready backend development.

Software Developer – XAD Technologies LLC – www.xadtechnologies.com

Aug 2024 – April 2026 | UAE

- Designed and developed scalable front-end and back-end architecture for enterprise applications with emphasis on performance, responsiveness and maintainability.
- Developed a FinTech-oriented Budget Management System covering financial tracking, payment orders, fund control, cash flow, reporting and management dashboards.
- Developed and maintained RESTful APIs and enterprise modules for ERP, Fleet Management, Property Management, Document Management and Approval systems.
- Managed the software development lifecycle from requirements and architecture through development, testing, debugging, optimization and deployment and ensured application security, scalability, reliability, code quality
- Used AI-assisted development tools including Claude, Antigravity, Cursor and Codex for coding assistance, debugging, refactoring, documentation and development acceleration.
- Built hands-on Python AI/ML prototypes using Flask/FastAPI and scikit-learn for business scenarios including budget/payment risk classification, tenant risk classification, rent/property forecasting and POS sales/demand regression.
- Practiced Logistic Regression, Linear Regression, Decision Trees and Random Forest with data preparation, train/test splitting, model fitting, evaluation, serialization and REST API prediction workflows.

Full Stack Developer – Mighty Warner Technology – www.mightywarner.ae

Mar 2022 – Jul 2024 | UAE

- Delivered responsive and SEO-optimized web applications for 50+ clients across multiple industries.

- Developed solutions using WordPress, Elementor, WooCommerce, Laravel, Node.js, Next.js, React.js and .NET Core.
- Applied best-practice development patterns, clean code, continuous integration and maintainable architecture.
- Provided technical expertise while working on new and existing modules, features and REST APIs.
- Collaborated closely with front-end, back-end and UI/UX teams to ensure seamless project delivery.
- Documented task progress, system architecture and development processes for maintainability.

Backend Developer – WebTrica Software House – www.webtrica.com

Jan 2021 – Jan 2022 | Pakistan

- Developed server-side web application logic using JavaScript and Node.js.
- Managed backend services and front-end integrations.
- Designed and maintained databases with focus on performance and responsiveness.
- Wrote reusable, testable and efficient code following best practices.
- Designed low-latency, high-availability backend applications.
- Implemented application security, SQL/NoSQL storage and caching mechanisms.

Mobile Application Developer – Time Expert Software House – www.timexperts.com.pk

2018 – 2020 | Pakistan

- Designed, developed and maintained Android applications using Java with MVC/MVVM architecture.
- Built cross-platform mobile applications using Flutter (Dart).
- Integrated RESTful APIs for authentication and payment workflows.
- Implemented responsive UI/UX, SQLite/Shared Preferences, validation and error handling.
- Performed debugging, testing, performance optimization and Google Play Store deployment.

Sales Associate – Azadea Group LLC – www.azadeagroupholding.com

March 2012 – Sept 2016 | UAE

- Managed customer profiles, preferences, and loyalty interactions using CRM and customer data systems.
- Operated POS systems for billing, refunds, exchanges, and accurate cash/card transactions.
- Handled inventory operations including stock receiving, replenishment, cycle counts, and discrepancy reporting.
- Monitored sales KPIs, daily reports, and customer data to support store performance and operational decisions.
- Followed SOPs, compliance procedures, and system controls while consistently meeting retail performance targets.

Course Trainer - Zabeel Institute – www.zabeelinstitute.ae

Sharjah, UAE

- Conducted 20+ courses covering Web Application, Mobile Application, Programming concepts.

Education

• Master of Computer Science

CGPA: 3.25

Mohammad Ali Jinnah University – Dec 20, 2026

Attested by HEC Pakistan & Ministry of Foreign Affairs

• Certificate Accounting Technician

Foundation Level

Emile Woolf College Manchester, United Kingdom – March 12, 2006

Core Technical Skills

Frontend: JavaScript (ES6+), TypeScript, React, Next.js, Angular, Vue.js, Nuxt, HTML5, CSS3, Bootstrap, Tailwind

Backend: Laravel (PHP), Node.js, Express.js, REST APIs, ASP.NET Core/.NET, Django, Flask, FastAPI, MVC, Services, Jobs, Queues, Events

Architecture: Event-Driven Architecture, RabbitMQ, Node.js Event Loop, Worker Threads, asynchronous processing, scalable backend systems

Databases: MySQL, MongoDB, Firebase, SQL/NoSQL, ERPNext, Odoo

AI/ML & Python: Python, scikit-learn, pandas, NumPy, Supervised Learning, Classification, Regression, Logistic Regression, Linear Regression, Decision Trees, Random Forest, model training/evaluation, REST prediction APIs

AI Fundamentals: Machine Learning, Unsupervised Learning, Clustering, Association, Reinforcement Learning, Data Science Basics, Deep Learning Basics, NLP, Computer Vision, Generative AI, LLM concepts

DevOps & Tools: Docker, Kubernetes, Git, Postman, RabbitMQ, cPanel, VPS, Cloud, AI coding tools: Claude, Antigravity, Cursor, Codex

Practices: Agile/Scrum, SDLC, System Design, Event-Driven Architecture, Code Reviews, Testing, Documentation, Security Best Practices

Cloud Platforms: AWS (EC2, S3, RDS, Lambda, IAM, CloudWatch), Microsoft Azure (App Service, Virtual Machines, Azure SQL, Blob Storage, Functions, Microsoft Entra ID), Google Cloud Platform/GCP (Compute Engine, Cloud Storage, Cloud SQL, Cloud Run, Cloud Functions, IAM)

LIST OF PROJECTS

- <https://apollosports.pk> (Shopify)
- <https://homeappliances.pk> (WordPress)
- <https://pkgiftshop.com> (MERN)
- <https://www.alfatah.com.pk> (WordPress)
- <https://sindhcrafts.com> (WordPress)
- <https://trims.pk> (WordPress)
- <https://bookberry.pk> (Node.js)
- <https://www.myvitaminstore.pk> (Angular)
- <https://www.cartpk.com> (Magento)
- Studently Mobile App (Android Java Mobile App)
- IELTS Desktop App (Electron JS + Nodejs)
- <https://raazlife.com> (WordPress)
- Budget Management Software (Laravel + Python AI/ML)
- Property Management Software (Laravel + Python AI/ML)
- shopping Cart Application (Python + Flutter)
- Fleet Management System (Laravel + Python)
- Document Management & Approval System (Laravel)
- <https://www.xadtechnologies.com> (Laravel)
- <https://xadcontracting.com> (Laravel)
- <https://www.xadtechnologies.com> (Laravel)
- <https://xadcontracting.com> (Laravel)
- Point of Sale System – MERN (React + Nodejs + Python AI/ML)
- Applied ML API Prototype – Python, Flask/FastAPI, scikit-learn; classification & regression scenarios for Property, Budget and POS systems
